Sequene Backward movement.

after bullet passed for new position.

of cases happened as went to the

gas house in gas chamber and negative

disturbance of position and forcing

motion back with bolt - also under

up spring inferior because small

of pins.

in position engage in teeth of bolt.

Not in backward movement.

Bars being engaged in feed

arm shafts move fast at

from right to left - taking

with it feed arm panel &

showing in turning wheel.

7. 4. 12. rotation magazines

Magazine. Magazine.

The 12th May is potatoes

by. feed of P. P. the cartilage

are forced down

channel by the elevator

ids is clear of lip

when it falls away

opening of 12. 7. 12.

The longer on the body

supplying blood and water.

The 12th is made by

in position by

drawn up / 1000
by May which is the
the neg. states draw
the cog wheel guide up
existed by 100 lb. bar
side of cog. way on
find them

Forward Movement.

Caused by action Return Spring.

When trigger pressed, release
~~the~~ bear from head.

The teeth in person frame
engaged in ^{cog} teeth of return spring
& the return spring beam
enable to move itself ~~the~~

person Rod is carried forward
taking with it the bolt
(which is unable to rotate)

As bolt moves forward
the top extractor meets it.

base of cartridge held in
position by cog guide sh.

& drives it forward &
downwards into position

The cog & bullet stops
governing this movement

The fore end of bolt hits
the head end of extractor, driving

it in, & thus locking
tail end out ready for

the next movement.

As locking dogs come

opposite looking man.
The ball is able to
rotate which it does
by reason of striker-
post leaving on twice
again again, can, slot.
At the same time
looking huge beams on
" recess takes force
of discharge.

At the same time
the extractions spring
over, & engage behind
rim of cty in breach
The striker strikes
Post & Piston Rod

Have another with $\frac{1}{2}$
No travel before being
home it - thus with ^{before being home}
a half of travel
the striker ~~passes~~
pierces the striker
way + face of balls -
hitting each of round
& causing explosion.

While the gun is
happening the boss
on the feed it, it, then
moving along the channel
of tail of feed it
moves the F. O. from
left to right.

taking with it.
Feed stamp/ant + 7/18
Retaining Stud. The
feed from Paul. moves
over projection of
Mag + ~~stop~~^{engages} behind
read for next movement.
The ~~Mag~~^{Mag} retaining stud
moves ^{along} face of slot.
Paul. depresses the Paul
thus allowing Mag. to
rotate on the next
movement.
The feed A-V. moves
across the project from
left to right would

have a tendency to
rotate the mag.
in a counter feedline
direction but is
prevented from doing
so by the rebound
paul being engaged
behind a projection

in Mag.

4th Day.

General Description

303 inch

weights

26 lbs

Points

Before Firing + ⁴¹¹

After Firing

✓ Clean all oil from bore. (2) tighten barrel mouth piece (3) tighten blank firing (4) test feed mechanism (5) Weigh return spring (6) Oil working parts behind B. L. P. (7) test mag's & drum. before while filling & examine spools & spare.

During Firing

✓ Turn gas regulator to prevent searing
2/ Test weigh on B. L. P.
3/ Oil Mag. Port + Striker Post. (4) replace partly filled mags, fire & return empty mags.
After Firing

✓ Immediately unload
✓ clean bore, after bore
✓ strip & clean thoroughly
✓ remove nickel fouling from gas vent. (5) replace breakages (6) wash dry
✓ Oil Magazine & 7/ leave the return spring at zero
